RE: WELL STIMULATION TREATMENT PERMIT DENIALS

Dear Ms. Gardner:

The Geologic Energy Management Division (CalGEM) received and reviewed Chevron's well stimulation treatment (WST) permit applications for eight (8) wells, collectively referred to by group project number "Chevron-432-007." A complete list of the wells is included with this correspondence as Attachment A.

This correspondence serves as notice that Chevron's WST permit applications for these eight wells are **denied**.

The WST permit applications are proposed for eight (8) wells located on Bureau of Land Management (BLM) property. Due to the wells' location on BLM land, CalGEM requested that you prepare an initial study as part of CalGEM's compliance with the California Environmental Quality Act (CEQA) as a lead agency before issuing WST permits for the proposed operations. As Chevron has indicated that it does not wish to proceed with an initial study for these WST permit applications, CalGEM is discontinuing its review and with this, denies the WST permit applications.

Thank you,

Uduak-Joe Ntuk
State Oil and Gas Supervisor
