## Part 2: Land Committed to Nonagricultural Use

Data not available for Land Committed to Nonagricultural Use.

## Part 3: Land Use Conversion from 2018-2020

Due to the large size of this table, it has been split into two tables. Table One has the conversions of all land uses to the Important Farmland categories (Prime Farmland, Farmland of Statewide Importance, Unique Farmland, Farmland of Local Importance, and Important Farmland Subtotal) and Table Two has the conversions of all land uses to the remaining land use categories (Grazing Land, Agricultural Farmland Subtotal, Urban and Built-up Land, Other Land, Water Area, and Total Area Inventoried).

*Table One*

Land Use Category	Prime Farmland	Farmland of Statewide Importance	Unique Farmland	Farmland of Local Importance	Important Farmland Subtotal
Prime Farmland (1)	no data	0	21	2,529	2,550
Farmland of Statewide Importance	0	no data	10	584	594
Unique Farmland (1)	35	0	no data	1,917	1,952
Farmland of Local Importance	467	844	510	no data	1,821
Important Farmland Subtotal	502	844	541	5,030	6,917
Grazing Land	0	0	28	4	32
Agricultural Land Subtotal	502	844	569	5,034	6,949
Urban and Built-up Land (4)	2	1	2	106	111

Land Use Category	Prime Farmland	Farmland of Statewide Importance	Unique Farmland	Farmland of Local Importance	Important Farmland Subtotal
Other Land	147	47	144	267	605
Water Area (5)	0	0	0	62	62
Total Acreage Converted	651	892	715	5,469	7,727

Footnote (1): Prime Farmland and Unique Farmland conversion to Farmland of Local Importance is primarily due to land left idle for three or more update cycles.

Footnote (4): Conversion from Urban and Built-up Land is primarily the result of linework improvements made at Canyon Lake and Lake Elsinore, a lack of sufficient infrastructure, and the use of detailed digital imagery to delineate more distinct urban boundaries.

Footnote (5): Water related conversions were primarily due to linework improvements made at Canyon Lake, Lake Elsinore, and Mystic Lake.

Table Two

Land Use Category	Grazing Land	Agricultural Land Subtotal	Urban and Built-up Land	Other Land	Water Area	Total Converted To Another Use
Prime Farmland	0	2,550	189	223	0	2,962
Farmland of Statewide Importance	0	594	50	90	0	734
Unique Farmland	7	1,959	17	334	0	2,310

Total Acreage Converted	333	8,060	6,025	4,157	253	18,495

Footnote (2): Farmland of Local Importance conversion to Other Land is primarily due to the delineation of low-density housing, rural commercial uses, vacant or disturbed land, and land graded for development.

Footnote (3): Farmland of Local Importance to Water related conversions were due to linework improvements made at Lake Elsinore and Mystic Lake.

Footnote (4): Conversion from Urban and Built-up Land is primarily the result of linework improvements made at Canyon Lake and Lake Elsinore, a lack of sufficient infrastructure, and the use of detailed digital imagery to delineate more distinct urban boundaries.

Footnote (5): Water related conversions were primarily due to linework improvements made at Canyon Lake, Lake Elsinore, and Mystic Lake.
