## Part 2: Land Committed to Nonagricultural Use

Data not available for Land Committed to Nonagricultural Use.

## Part 3: Land Use Conversion from 2018-2020

Due to the large size of this table, it has been split into two tables. Table One has the conversions of all land uses to the Important Farmland categories (Prime Farmland, Farmland of Statewide Importance, Unique Farmland, Farmland of Local Importance, and Important Farmland Subtotal) and Table Two has the conversions of all land uses to the remaining land use categories (Grazing Land, Agricultural Farmland Subtotal, Urban and Built-up Land, Other Land, Water Area, and Total Area Inventoried).

*Table One*

Total Acreage Converted	2,652	3,720	837	9,155	2,116	15,828

Footnote (1): Conversion from Prime Farmland to Other Land is primarily due to the delineation of levees on Ryer Island, along Cache Slough, Lindsey Slough, Ulatis Creek, and improved mapping of canals and freeways.

Footnote (2): Conversion from Grazing Land to Other Land is primarily due to marsh land in the Hill Slough area, Lindsey Slough, Montezuma Slough, and Decker Island.

Footnote (3): Conversion from Urban and Built-up Land is primarily due to a lack of sufficient infrastructure, abandoned projects and the use of detailed digital imagery to delineate more distinct urban boundaries. Examples include cleanup of portions of the Northeast section and runway of Travis Air Force Base, Spyglass Hill Open Space, and the undeveloped areas of Mare Island, the cities of Benicia and Rio Vista, the Rio Vista Municipal Airport, and the closure of Green Tee Golf Club in Vacaville.

Footnote (4): Water related conversions are due to linework improvements primarily along the San Pablo Bay, Sacramento River, Lagoon Valley Reservoir, Lake Herman, Lake Madigan, Carquinez Strait, and the sloughs within the county.
